ABSTRACT

This supplement to the six-volume series of annotated bibliographies provides a ready reference, arranged alphabetically, to all authors cited in the six volumes. It identifies senior authors and indicates precise location for each of the 3,087 citations in the series.

In addition, a general subject index is included. It is arranged alphabetically, by subject, and indicates the volume and citation numbers for each of 95 general subjects with their associated sub-subjects.

INTRODUCTION

This supplement is published to aid readers of the six-volume annotated bibliography on immunofluorescence. It consists of an author index and a subject index compiled from the six volumes.

Both indexes are arranged in three columns. The first lists the author or the subject. The second column indicates the pertinent volume (I through VI). The third column shows the pertinent accession number.

The title of the bibliography is Miscellaneous Publication 20, Immunofluorescence, An Annotated Bibliography, with subtitles to indicate the general subject field included in each:

- I. Bacterial Studies
- II. Viral Studies
- III. Studies of Fungi, Metazoa, Protozoa, and Rickettsiae
- IV. Studies of Animal Physiology
- V. Diagnostic Applications and Review Articles
- VI. Technical Procedures
